IB Sheet 7 전자정부표준 프레임 워크 호환성 검증 과제 1 sample(게시판) 변경

New > egovFrame Web Project > generate example  $\bar{\mathbb{A}} \exists$  > finish

## 개발 준비 사항

pom.xml 에 jackson lib 추가

ibsheet 제품 파일 복사

# 게시판 화면 수정(egovSampleList.jsp)

head에 ibsheet 관련 js 파일 include

....

게시판 테이블 부분 수정

body에 onload 이벤트를 통해 ibsheet 객체 초기화

<script>

```
/* ibsheet 객체 초기화 */
function page_load(){
       //객체 생성
        createIBSheet2(document.getElementById("ibsheet_div"),"mySheet","796px","276px");
       mySheet.SetTheme("WHM","ModernWhite");
       //컬럼 설정
       initdata = {};
       initdata.Cols = [
               {"Header":"NO","Type":"Int","Width":40,"SaveName":"no",Align:"Center",Format:"Integer",FitColWidth:0}
               ,{"Header":"<spring:message
                                                                                                                code="title.sample.id"
/>","Type":"Text","Width":100,"SaveName":"id",Align:"Center","HoverUnderline":"1",FitColWidth:0}
               ,{"Header":"<spring:message
                                                                                                             code="title.sample.name"
/>","Type":"Text","Width":150,"SaveName":"name",Align:"Center",FitColWidth:0}
                ,{"Header":"<spring:message
                                                                                                            code="title.sample.useYn"
/>","Type":"Text","Width":80,"SaveName":"useYn",Align:"Center",FitColWidth:0}

for(var i=0;i<mydata.length;i++){
    mydata[i]["no"] = cnt - (i+1); //NO 컬럼 처리
}
return {"Data":mydata};
}
</script>
</body style="text-align:center; margin:0 auto; display:inline; padding-top:100px;" onload="page_load()">
```

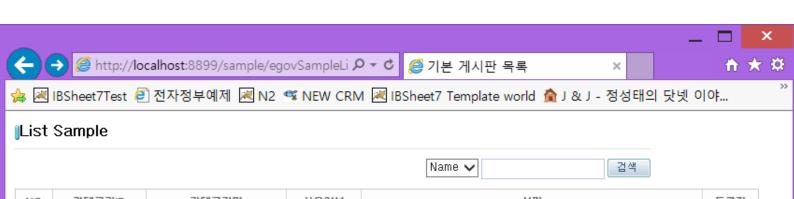

#### 카테고리 ID 컬럼 클릭시 Detail 연결

```
<script>
function mySheet_OnClick(row,col,value){
    if(mySheet.ColSaveName(col)=="id"){ //카테고리ID 컬럼 클릭시
        fn_egov_select(value);
    }
}</script>
```

#### 컨트롤러 수정 (EgovSampleController.java)

```
import org.codehaus.jackson.map.ObjectMapper;
import org.codehaus.jackson.map.ObjectWriter;
 * 글 목록을 조회한다. (pageing)
 * @param searchVO - 조회할 정보가 담긴 SampleDefaultVO
 * @param model
 * @return "egovSampleList"
 * @exception Exception
@RequestMapping(value = "/egovSampleList.do")
public String selectSampleList(@ModelAttribute("searchVO") SampleDefaultVO searchVO, ModelMap model) throws Exception {
        /** EgovPropertyService.sample */
        searchVO.setPageUnit(propertiesService.getInt("pageUnit"));
        searchVO.setPageSize(propertiesService.getInt("pageSize"));
        /** pageing setting */
        PaginationInfo paginationInfo = new PaginationInfo();
        paginationInfo.setCurrentPageNo(searchVO.getPageIndex());
        paginationInfo.setRecordCountPerPage(searchVO.getPageUnit());
        paginationInfo.setPageSize(searchVO.getPageSize());
        searchVO.setFirstIndex(paginationInfo.getFirstRecordIndex());
        searchVO.setLastIndex(paginationInfo.getLastRecordIndex());
```

```
search VO. set Record Count Per Page (pagination Info. get Record Count Per Page ()); \\
        List<?> sampleList = sampleService.selectSampleList(searchVO);
        //리턴 데이터를 jackson lib를 통해 json 형태로 변경
        ObjectWriter ow = new ObjectMapper().writer();
        Map ibsheetResult = new HashMap();
        ibsheetResult.put("Data",sampleList);
        String jsonStr = ow.writeValueAsString(ibsheetResult);
        model.addAttribute("resultList", jsonStr);
//
                 model.addAttribute("resultList", sampleList);
        int totCnt = sampleService.selectSampleListTotCnt(searchVO);
        paginationInfo.setTotalRecordCount(totCnt);
        model.addAttribute("paginationInfo", paginationInfo);
        return "sample/egovSampleList";
```

# IB Sheet 7 전자정부표준프레임워크 호환성 검증 과제2

Simple Template 연동 가이드

프로젝트 생성

New > eGovFrame Template Project 선택

Simple Homepage 생성

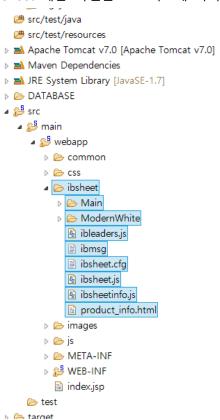

#### 개발 준비 사항

pom.xml 에 jackson lib 추가

<dependency>

```
<groupId>org.codehaus.jackson</groupId>
  <artifactId>jackson-mapper-asI</artifactId>
  <version>1.9.13</version>
  </dependency>
```

#### ibsheet 제품 파일을 프로젝트에 복사

## 공지사항 list 수정 (EgovNoticeList.jsp)

head에 ibsheet 관련 js 파일 추가.

#### table 부분 수정

body의 onload 이벤트에 ibsheet 초기화 부분 추가.

```
<script>
   function page_load(){
       //ibsheet 객체 생성
       createlBSheet2(document.getElementById("ibsheet_div"),"mySheet","796px","276px");
       //컬럼 설정
       initdata = {};
       initdata.Cols = [
               {"Header":"번호","Type":"Int","Width":80,"SaveName":"nttld",Align:"Center",Format:"Integer"}
               ,{"Header":"제목","Type":"Text","Width":300,"SaveName":"nttSj",HoverUnderline:1,Cursor:"Pointer"}
               <c:if test="${brdMstrVO.bbsAttrbCode == 'BBSA01'}">
               ,{"Header":"게시시작일","Type":"Text","Width":80,"SaveName":"ntceBgnde",Align:"Center"}
               ,{"Header":"게시종료일","Type":"Text","Width":80,"SaveName":"ntceEndde",Align:"Center"}
               </c:if>
               <c:if test="${anonymous != 'true'}">
               ,{"Header":"작성자","Type":"Text","Width":80,"SaveName":"frstRegisterNm",Align:"Center"}
               </c:if>
               ,{"Header":"작성일","Type":"Text","Width":120,"SaveName":"frstRegisterPnttm",Align:"Center"}
```

```
,{"Header":"조회수","Type":"Text","Width":60,"SaveName":"ingireCo",Align:"Center"}
            ,{"Header":"bbsId","Type":"Text","Width":60,"SaveName":"bbsId",Hidden:1}
    ];
    IBS_InitSheet(mySheet,initdata);
    mySheet.SetEditable(0);
    mySheet.SetTheme("WHM","ModernWhite");
    mySheet.LoadSearchData(${resultList});
//답글에 대하여 왼쪽에 padding 처리
 function mySheet_OnLoadData(data){
    var cnt = ${paginationInfo.totalRecordCount+1 - ((searchVO.pageIndex-1) * searchVO.pageSize)};
    var jsonObj = JSON.parse(data);
    var mydata = jsonObj["Data"];
    for(var i=0;i<mydata.length;i++){</pre>
            var re_cnt = mydata[i]["replyLc"];
            mydata[i]["nttSj"] = lpad(re_cnt)+ mydata[i]["nttSj"];//padding처리
            mydata[i]["no"] = cnt - (i+1); //번호 처리
    return {"Data":mydata};
//padding 함수
function lpad(cnt,str){
    if(typeof(str) = = "undefined"){
            str = " ";
```

글 선택시 Detail 화면 전환 이벤트 설정

```
//글 선택(클릭)시 상세화면으로 전환 이벤트
function mySheet_OnClick(row,col){
    if(mySheet.ColSaveName(col)=="nttSj"){
        document.subForm.bbsld.value = mySheet.GetCellValue(row,"bbsld");
        document.subForm.nttld.value = mySheet.GetCellValue(row,"nttld");
        document.subForm.submit();
    }
}
```

## 조회 컨트롤러 수정(EgovBBSManageController)

```
import org.codehaus.jackson.map.ObjectMapper;
import org.codehaus.jackson.map.ObjectWriter;
/**
   * 게시물에 대한 목록을 조회한다.
   * @param boardVO
   * @param sessionVO
   * @param model
